viflow 6 kann nicht installiert werden: Unexpected error installing the package. Error code is 2739 (KB10348)

Sebastian Eich - 2018-08-06 - in Installation and Activation

If you try to install viflow the error "Unexpected error installing the package" occurs. The error code is 2739.

Solution:

In order to install viflow, two Windows DLL files must be re-registered. Proceed as follows:

- Start the Windows Command Prompt (cmd) with admin rights
- Navigate to the directory: "C: \ Windows \ SysWOW64" (for 64bit Windows)
- Run the commands: regsvr32 vbscript.dll and regsvr32 jscript.dll

Then, try to reinstall viflow 6.
